PLANT THE SEED™

Olivera

LESSON PLAN

Tree Planting - Prep to Grade 2

Session to be held outdoors, weather permitting.

Activities

Start by introducing why we are planting trees. Students to brainstorm why trees are important:

- cooling, shelter, habitat, food

Introduce trees to be planted and what they will grow into

- shade, seeds, homes for animals

Demonstrate how to plant tubestock.

Students pair up and collect 2 plants and a trowel.

Tree planting in selected site/s and then watering.

Objective

The aim of this session is to plant trees within the school grounds to improve canopy coverage and biodiversity. To help students understand its significance.

Learning Intentions

At the end of this session students will be able to:

- explain why trees are important for people, animals and plants
- understand how to plant a tree seedling and care for it so it grows.

Reflection

Draw a picture of you with the baby tree today, and you with the grown up tree.
What animals might make their home in the tree you planted?

PLANT THE SEED™

LESSON PLAN

Tree Planting - Grade 3 & 4

Session to be held outdoors, weather permitting.

Activities

Start by introducing why we are planting trees. Students to brainstorm why trees are important:
- cooling, shelter, habitat, food

Introduce tree species to be planted and what they will grow into
- shade, seeds, homes for animals
- how they benefit the environment

Demonstrate how to plant tubestock. Students pair up and collect 2 plants and a trowel.

Tree planting in selected site/s and then watering.

Objective

The aim of this session is to plant trees within the school grounds to improve canopy coverage and biodiversity. To help students understand its significance.

Learning Intentions

At the end of this session students will be able to:

- explain why trees are important for people, animals and plants
- understand how to plant a tree seedling and care for it so it grows.
- understand how planting trees for the future can benefit our environment

Reflection

Draw a picture of you with the baby tree today, and you with the grown up tree.
What animals might make their home in the tree you planted?

PLANT THE SEED™

LESSON PLAN

Tree Planting - Grade 5 & 6

Session to be held outdoors, weather permitting.

Activities

Start by introducing why we are planting trees. Students to brainstorm why trees are important:

- cooling, shelter, habitat, food

Introduce tree species to be planted and what they will grow into

- shade, seeds, homes for animals
- how they benefit the environment and combat climate change

Demonstrate how to plant tubestock. Students pair up and collect 2 plants and a trowel.

Tree planting in selected site/s and then watering.

Objective

The aim of this session is to plant trees within the school grounds to improve canopy coverage and biodiversity. To help students understand its significance.

Learning Intentions

At the end of this session students will be able to:

- explain why trees are important for people, animals and plants
- understand how to plant a tree seedling and care for it so it grows.
- identify how these species of trees work together with other plants around them
- understand how planting trees can combat climate change and improve biodiversity.

Reflection

Draw a picture of you with the baby tree today, and you with the grown up tree.
What animals might make their home in the tree you planted?
